

# Process / Development Engineer

## MMS AG, Urdorf, Switzerland

MMS is a medium sized engineering company focused on our core competency of delivering membrane technology to the food, biotech, and dairy industry.

We are looking for a dynamic person who is interested in learning and improving skills within the wide range of membrane filtration applications offered by MMS.

### Your tasks

- Preparation and running of membrane trials
- Developing processes for customers
- Writing trial reports
- Running pilot trials in-house and at customer location
- Supporting the piloting team to develop new products
- Testing and commissioning of pilot units

### Your profile

- You have a technical or engineering background
- Knowledge and experience in membrane filtration would be an advantage.
  - Knowledge and experience in the food, beverage, or dairy sector
- Practical and hands-on
- EU/CH citizen

### We offer

- A place to learn and develop as an engineer
- Working in a fast moving and innovative company
- Applying membrane technology to vast range of sectors
- Working with international customers
- We develop, engineer, construct, automate and commission our units.  
You will be able to get the experience in all parts of the process.

We offer an interesting and dynamic job in an innovative and customer-focused company. The right candidate will be part of a dynamic team with an open approach to new possibilities and applications of membrane filtration in different industries.

Contact MMS at +41 44 735 59 00 for more information and send your application to Michael Güds on [cv@mmsx.com](mailto:cv@mmsx.com).

MMS designs and supplies innovative membrane filtration solutions for the separation, concentration, fractionation, purification and isolation of all classes of molecules. We work within, food, beverage, extracts, chemical industry water recovery and dairy.

The company was established in 1995 and has since then been successful in supplying innovative process solutions to major international customers.

MMS is headquartered in agglomerations area Zurich, Switzerland, with around 50 experts handling all engineering, automation, and plant manufacturing activities in-house.
